CONTRIBUTING AUTHOR BIOS:

Mary Frances Agnello is Professor at Akita International University in Japan where she teaches and researches in the Department of International Liberal Arts. Her research focuses on discourses of education, language, literacy, and culture, in addition to foundations of education and critical pedagogy.

Carolyne Ali-Khan is an Associate Professor in the Foundations and Secondary Education Department at the University of North Florida. Her research interests include autoethnography and visual methods.

Michelle Brendel is trained in family therapist and Gestalt-therapist. She worked with children in foster care before she joined the initial teacher training for preschool and primary school at the University of Luxembourg, where her research interests are collaborative teacher research, inclusive education, and portfolio approaches.

Kimberly J. Frazier-Booth is a National Board Certified teacher in her 15th year of teaching high school English Language Arts and a doctoral student at the University of Massachusetts, Boston. She is married and has one daughter.

Roger Frisch is a preschool teacher at the primary school of Mersch in Luxembourg. He works part time for the Bachelor of Educational Sciences at the University of Luxembourg, where he also collaborates in different research projects on language learning and science.

Tricia M. Kress is an Associate Professor and graduate program director of the Urban Education, Leadership and Policy Studies doctoral program at the University of Massachusetts Boston. Her research uses critical pedagogy, cultural sociology, and auto/ethnography to rethink teaching, learning and research in urban schools.

Patricia Krueger-Henney is an Assistant Professor in the Urban Education, Leadership and Policy Studies doctoral program at the University of Massachusetts Boston. Through participatory action research and youth-centered visual narratives Patricia documents how young people perceive and experience social injustices produced and reproduced by current purposes of education.

William (Bill) M. Reynolds teaches in the department of Curriculum, Foundations and Reading at Georgia Southern University. He has authored, co-edited and co-authored numerous books, articles and chapters on critical theory, youth studies, critical cultural studies, critical pedagogy and curriculum studies.

Christina Siry is an elementary science education researcher and teacher educator, and she has worked in the US prior to relocating to Luxembourg, where she is currently a professor of learning and instruction at the University of Luxembourg. Her research is grounded in critical theoretical approaches and she draws on participatory and visual methodologies in her work with teachers and children around the teaching and learning of science.
